

## INSTALLING A NETWORK PRINTER - MACINTOSH

1. Open System Preferences, and under the Hardware group, double-click **Print & Fax**.

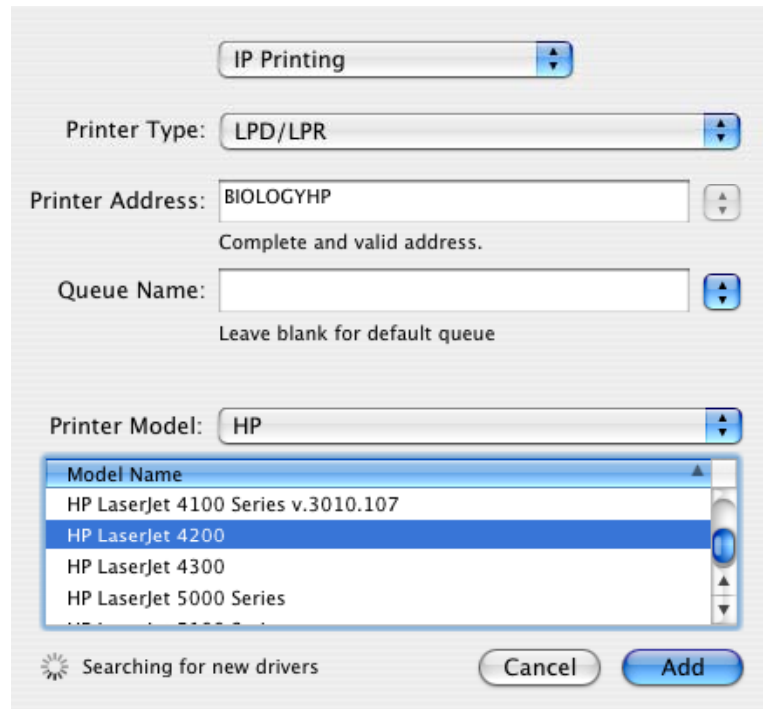

2. Click the **Setup Printers...** button.

3. In the Printer List window, click the **Add** button.

4. Choose IP Printing in the first pull down box. Then, type in the name of your printer (ie BIOLOGYHP, GEOLOGYHP, etc.) in the Printer Address window. Finally, choose the proper printer model for the printer you are printing to, and click the **Add** button.

5. The printer is now added and you may choose to make it you default printer by pressing highlighting the added printer and clicking the **Make Default** button.
