

Connecting Windows XP to KSC_Student Wireless Network

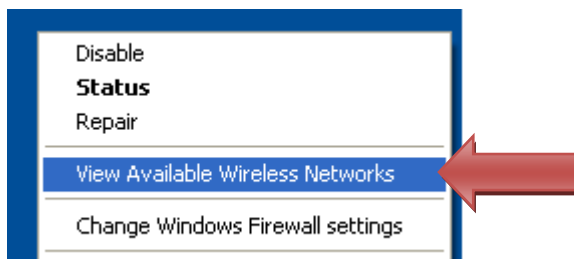

NOTE: These instructions are the recommended way to connect to Keene State College student wireless network. You may be running a different wireless card utility and some of the settings may be located in different locations.

1. Go to your **Control Panel** and double-click on **Network Connections**. You may need to double-click on Network and internet connections then Network connections depending on your preferred view.

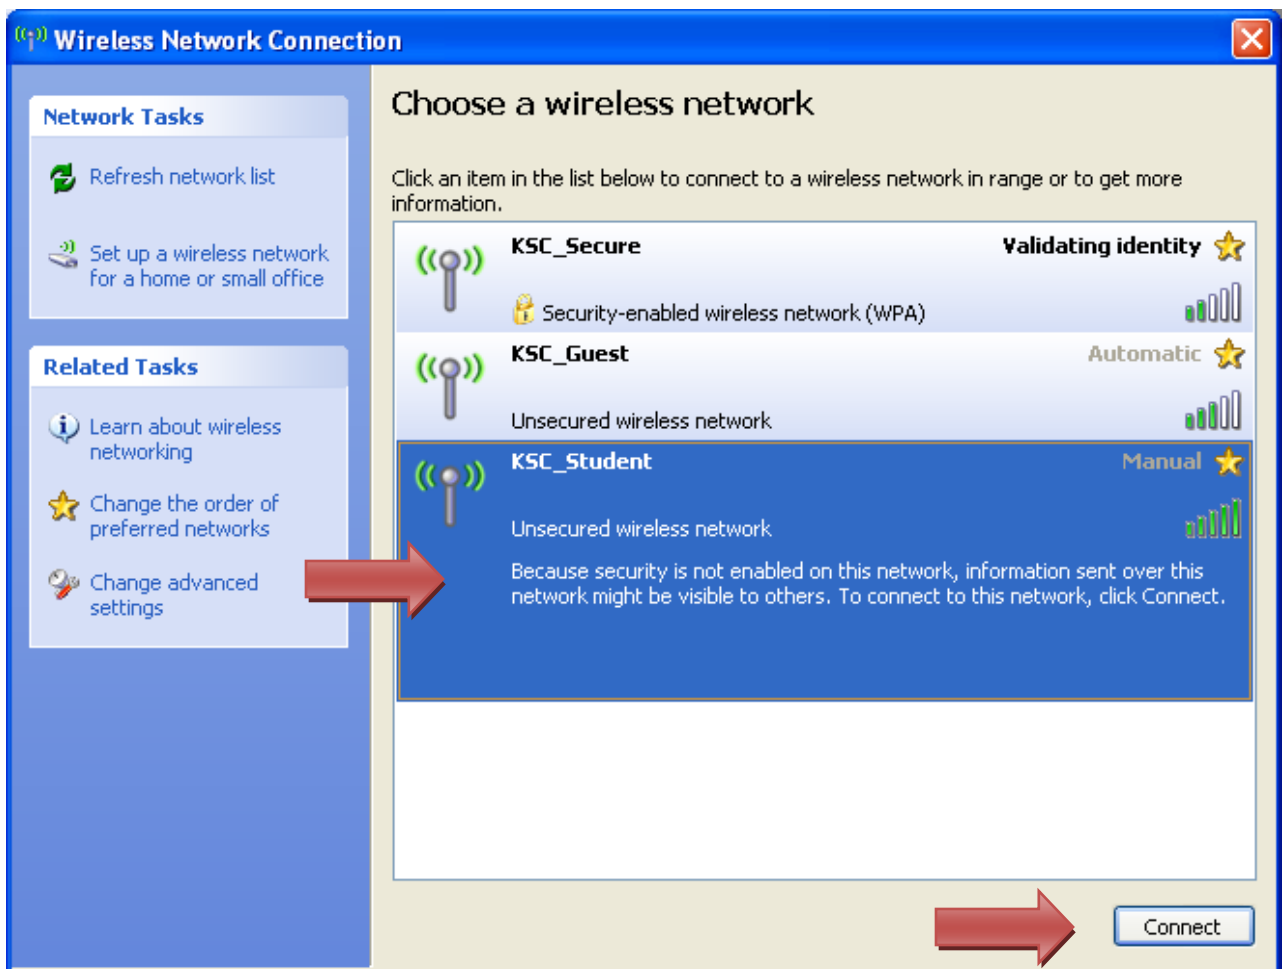

2. Right-click on **Wireless Network Connection** and confirm the wireless connection is enabled. You will know your adaptor is enabled if the only selection is "Disable" as shown here. If it is not enabled and select enable.

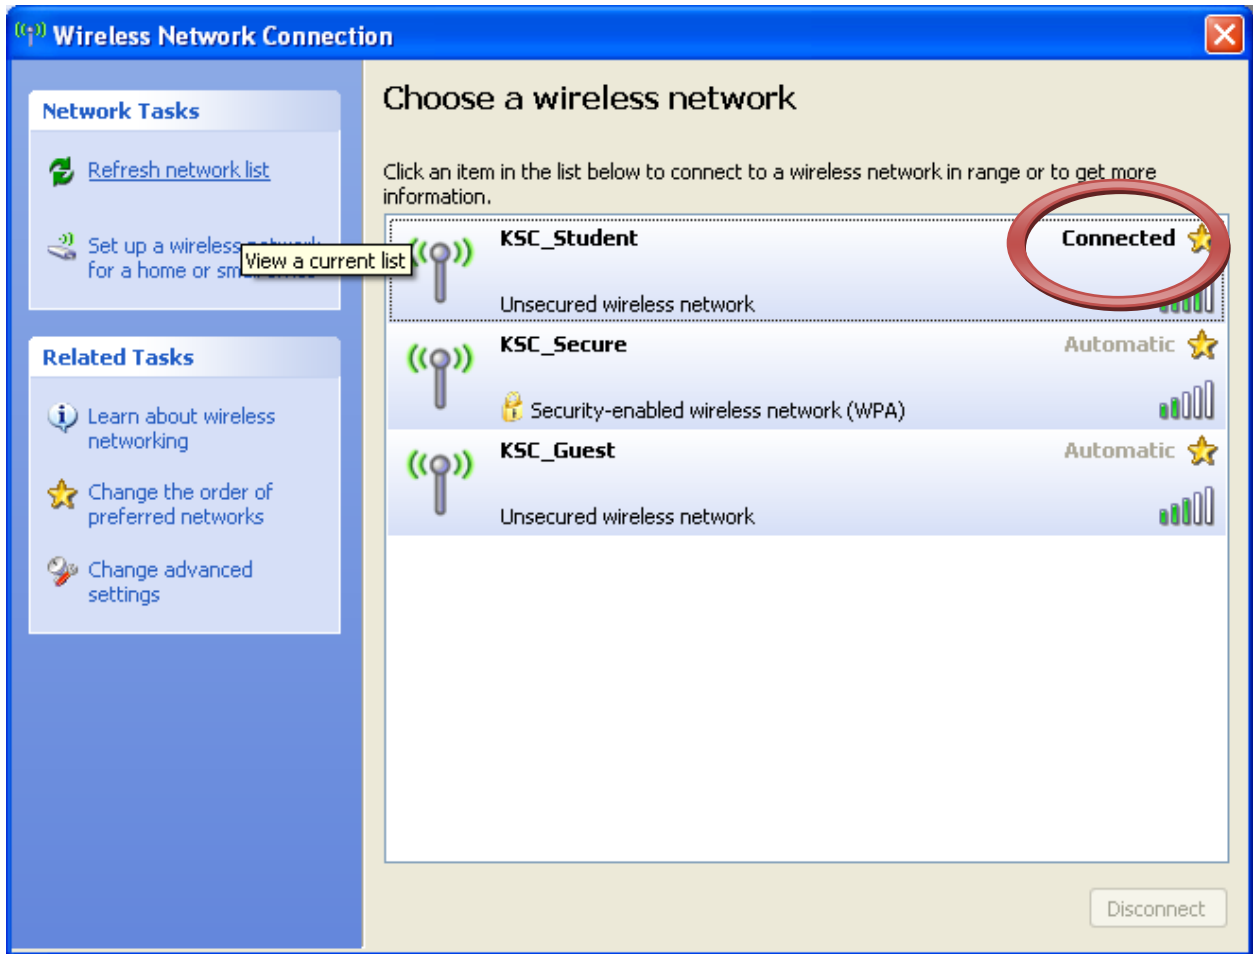

3. Now right mouse click on  the **windows wireless network connection utility** and select **"View Available Wireless networks"**

4. This will open up the Wireless network connections window and display all available broadcast networks in range of your wireless network card.

5. Select the **KSC_Student** network and then click on **Connect**.

You will now see **“Connected”** in the **Wireless Network Connection** bar for KSC_Student.

Click on the close window icon  in the upper right corner of the **Wireless Network Connection** window.

You’re done! When you are within range of the KSC_Student wireless network, you should connect automatically. No more configuration is needed for this wireless access.

If you have any questions concerning this or any other technology issue, please contact the HelpDesk at 358-2532, email helpdesk@keene.edu or stop by our office on the 2nd floor of Elliot Hall.
