The *San Francisco Chronicle* wrote that *Birdhouse* is "a superb integration of circus skills, music, light, and choreography." See how a woeful widget factory becomes a frolicsome funhouse, as the incomparable mechanics fly, climb, and contort their way through rotating gears, trampoline walls, and aerial loops.

The Cirque Mechanic's performance is funded in part by the Expeditions program of the New England Foundation for the Arts (NEFA), made possible with funding from the National Endowment for the Arts (NEA) regional touring program and the American Masterpieces Initiative, with additional support from the six New England state art agencies.

Special thanks to our corporate sponsor  
Kingsbury Foundation.
