## Bid # 13199-0001 – Commencement Stage, Video and Sound Question

### Addendum #1

1. The sound bid specifies speakers on stands to cover the B1 seating area as well as seating area A.

The layout diagram does not indicate these areas. Can you please clarify these locations?

L'Acoustic MTD108 Speakers may be used for rear fill to make coverage of the seating area even.

Expectations are there will be even coverage of all seating front to back with a  $\pm 1$ db tolerance.

Important that speakers obstruct as few people as possible and not take away from the aesthetics of the event.
